

CAREERS EDUCATION AND GUIDANCE AT RANGE: INFORMATION FOR EMPLOYERS

The rapidly changing labour market means that good quality careers education and guidance is essential for young people in education. We know that employers are increasingly looking for flexibility and transferable skills in their employees, whether they be school leavers, graduates or experienced workers. Careers education and guidance at Range aims to help students to develop and to recognise these skills to prepare them to become successful employees .

Careers Education

There is a comprehensive careers education programme which starts in Year 7 and carries on through to Year 13. The programme has three strands: self-awareness and development , career exploration and career management, All three strands are covered in each year group. As part of this, we are keen to engage with local employers in order to keep staff and students up-to-date with current labour market information. Students undertake work experience in both Year 11 and Year 12 and we welcome employers from a variety of sectors into to schools to give talks and to provide opportunities for our older students to network and make contacts.

Careers Guidance

All our students have at least one Careers interview with a professional Careers Adviser who visits school twice a week. Careers interviews help students to put their Career plans into action and give them a chance to ask any questions which they have following their careers lessons.

We welcome the opportunity to meet with local employers to discuss ways in which they might support our students' career learning. Please contact Ms Gooding, Careers Co-ordinator, at school if you can help.
