

RANGE HIGH SCHOOL SCHOOL ETHOS AND VALUES

A Modern School with Traditional Values

The school should enable students:

- to develop a sense of self-respect and physical well-being and the capacity to live full lives as independent, self-motivated, self-disciplined adults with the ability and desire to contribute to the welfare of others;
- to develop lively, enquiring minds, the ability to question, to argue rationally and apply themselves to tasks;
- to acquire and apply knowledge, skills and concepts relevant to all aspects of life: at home, in employment, at leisure and as citizens;
- to seek a reasoned set of attitudes, values and beliefs and a respect for and understanding of other cultures and societies;
- to understand the rapidly changing world in which they live;
- to appreciate achievements and aspirations in all areas of human life;
- to develop their own particular talents.

In addition, the school should aim to be a caring and supportive community with a concern for all who are in any way involved in its life; and promote good relationships with the community it serves.

Challenge, Support, Flourish!
