NHS Test and Trace: COVID-19 testing for staff and students

Dear Parent/Carer,

We are working to keep Range High as safe as possible. You may have heard that testing for those without coronavirus symptoms is beginning in schools across the country using new, quicker COVID-19 tests known as 'lateral flow tests'.

Along with the other protective measures we are taking, these tests will help staff and students to remain in school safely. Up to one third of people who have coronavirus experience no symptoms. By testing we will help to stop the virus spread and help to keep Range open as safely as possible. The test is voluntary, but I would encourage everyone to take it.

We will be testing all staff and students who want to participate from week commencing 4 January 2021. On the w/b 4th January, we will focus on Y11 and Y13 students who will be in school as normal. We will focus on other year groups from the w/b 11th January when they return as normal, or earlier if possible.

I enclose an instructional leaflet with some more information.

If you are happy for your child to be tested, please go to the below link and complete the form. The form can be submitted once per child.

[NHS Test and Trace consent form for COVID-19 testing](#)

Those taking the test will be supervised by trained staff. The 'lateral flow' tests are quick and easy using a swab of your nose and throat. For under 18s, staff can oversee the swab process.

Results (which take around half an hour from testing) will be shared directly with staff and pupils participating. Where participants are under 16, parents or legal guardians will also be informed.

These tests have been and continue to be available at three sites in Sefton and we would encourage you to make use of these facilities before sending your child back into school, if possible.

We know these tests work - in validation studies conducted by Oxford University and Public Health England, they were shown to be as accurate in identifying a case as a PCR test

(99.68% specificity). The tests have lower sensitivity but they are better at picking up cases when a person has higher viral load, hence the need to test frequently.

Testing will be offered free of charge. I hope that this new system will help further reduce instances of Covid within the school.

Yours sincerely,

Mr M McGarry

Headteacher

Further NHS Guidance and FAQ below:

What if a pupil tests positive?

Participating staff and pupils who test positive will be informed about their results individually. Where participants are under 16, parents or legal guardians will also be notified.

Pupils will need to take a further 'PCR test' (similar to those done in local and regional testing sites) on the same day (or as soon as possible). You can go to www.gov.uk/get-coronavirus-test or call 119 to book a follow-up test.

During this time while they wait for the PCR result (via text / email) they will need to self-isolate.

If the PCR test returns a positive result you will have to self-isolate and follow the guidance from NHS Test and Trace.

What happens if the test is negative?

They will be able to stay in school and resume their activities as normal. A pupil will only be told if they test positive on a 'lateral flow' test, so if you do not hear you can assume it was negative. A small number of pupils may need to repeat the test if the first test was invalid or void for some reason.

What if a close contact at school/college tests positive?

A close contact of someone in school/college who has tested positive for COVID-19 will be able to return to school if they agree to be tested once a day for 7 days and the test is negative. If they do not want to take the test, they will need to self-isolate as per the national guidelines. This does not apply to household members or close contacts outside of school who will still need to self-isolate. Further details will be provided at the time, but if you would prefer to self-isolate instead of doing daily testing, you can.

What if my child develops symptoms?

This testing programme at school is for people with no symptoms. If your child develops symptoms at any time (such as a high temperature; a new, continuous cough; or a loss or change to their sense of smell or taste) they must immediately self-isolate, and book a test by calling 119 or by visiting: <https://www.gov.uk/get-coronavirus-test>.
